

# SPACE MUSIC II

Draw a line from the name of the planet to its description:

- Mars            same size as earth, hot enough to melt lead
- Mercury        discovered by a New Mexico man, farthest from sun, tiny & icy
- Jupiter        tilted on its side, looks blue because of methane gas
- Saturn         dusty, red with 2 moons, very cold, once had water on it
- Uranus         biggest planet, made of gases, earth could fit in its huge red spot
- Venus          like our moon with craters, has an atmosphere
- Pluto          has rings of rock and ice

Write the name underneath the instrument you would hear in a marching band (if it played on earth):

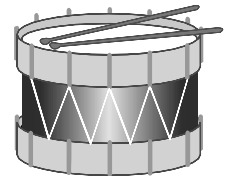

\_\_\_\_\_

\_\_\_\_\_

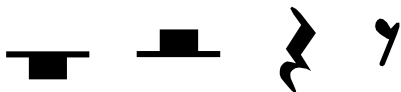

\_\_\_\_\_

\_\_\_\_\_

In the example used in the show, which 2 basic elements of music are missing from the "space" music?    \_\_\_ Timbre \_\_\_ Melody \_\_\_ Rhythm

These are rest symbols that tell musicians NOT to play so there is "space" in the music:

whole    half    quarter    eighth

These are symbols for notes that tell musicians to play:

whole    half    quarter    eighth

Circle the rest symbols in this line of music:
